

REFERENCE FOR ROCK ART DESIGNS – MR BRIGHTON

I had a wooden deck surrounding my swimming pool, which due to the elements was in a state of disrepair. I then decided to cement up the area and have it painted in a rock art motif. I discovered Brighton's Rockart designs on the internet and gave him a call.

We arranged for him to come and give me a quotation in the following week. His quote was more than reasonable, labour costs were kept very low with the materials being the costlier of the two. He arrived on a given date and time with his team. They work extremely fast and within a day, the deck was removed and dumped. Brighton is an artist at work, visualizing the end product while satisfying the client's requirements at the same time. As they proceeded I asked to add some extra jobs for which he again, quoted low costs.

I waited another week while the cement was drying and on the Saturday, Brighton came to paint. His rock art is truly impressive, visually appealing and is of a sturdy construction. He is so confident in his work that he offered that if something was wrong or broke, etc. he would come repair it for free. I would recommend his services to anybody who requires rock art designs. I have shown his work to my colleagues at work and they too will be contacting him soon.
